Art Unit: 2629

1. Status: Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 07-08-2007 under request for reconsideration, which have been placed of record in the file. Claims 1-24 are pending in this action.

Response to Amendment

2. Claims 1-24 are pending. Applicant's argument, see Remark, filed 07-08-2007, with respect to Claims 1, 9 and 17 regarding "a gate driver outputting scan signals to the gate electrodes; a data driver outputting the video signals to the data electrodes according to the image control signal, and a voltage controlling signal corresponding to a brightness adjustment signal; and a driving voltage generator outputting a driving voltage to the light emitting elements according to the voltage controlling signal" have been fully considered, extensively searched in prior art as well as PGPUB, and NPL and are persuasive as they do overcome prior art rejection; which puts application number 10797219 in condition for allowance. The prior art rejection mailed on 04-18-2007 is withdrawn.

Allowable Subject Matter

- 3. Claims 1-24.
- 4. The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed on 07-08-2007 are convincing. As argued by applicant in remarks under claim rejection page 10, paragraph, 2 and 3 pages 12,13 and page 14 paragraphs

Art Unit: 2629

1,2, the prior art of Kawabe et al. (US 2003/0169247 A1), Yamada, Atsushi (US 2003/0169226) and Sono (US 2003/0117361 A1) fails to recite or disclose the uniquely distinct features represented by underlined bold claim below combined with all the other limitations of independent claims;

a gate driver outputting scan signals to the gate electrodes; a data driver outputting the video signals to the data electrodes according to the image control signal, and a voltage controlling signal corresponding to a brightness adjustment signal; and a driving voltage generator outputting a driving voltage to the light emitting elements according to the voltage controlling signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
